

# ON THE RIGHT COURSE

what are *you* taking next semester?

On the Right Course is a data visualization tool that leverages old course data to help Olin students make a more informed decision as to what classes to take next semester. Students can filter to get just the amount of data they want.

some interesting things found:

linearity has gone through A LOT of iterations  
all most everyone takes PoE first semester sophomore year  
a significant of non ECEs and E:C take SoftDes

libraries of note used:

pandas (for creating and manipulating the data frame)  
matplotlib (for creating the plots, with a lot of tweaks)  
flask (to integrate with html/css)
